CYBERNETICS

Volume 10, Numbers 1-6, 1974

(A translation of Kibernetika)

Volume 10, Number 1 January-February, 1974

	Eng./Russ.	
Theory of Parallel Programming. Part I: Survey of Practical Aspects — V. E. Kotov	1	1
Coefficient of Internal Stability of Graphs — A. D. Korshunov	19	17
Covering a Graph by a Set of Paths Originating at a Single Vertex — I. S. Grunskii and D. V. Speranskii	34	29
Interaction of Stochastic Systems Having a Finite Number of States — N. K. Zlatorunskii	41	35
Tape Complexity of Languages Which are Recognized by Two-Way Push-Down Automata with a Finite Number of Turns — A. S. Barashko	47	40
Check Words for the States of a Finite Automation — S. M. Gobershtein	54	46
Automation of Printed-Circuit Design — A. V. Petrosyan, Yu. G. Shukuryan, S. E. Markosyan, and S. L. Ambaryan	59	50
A Method of Statistical Check of Logic Schemes — M. S. Bershtein and A. M. Romankevich	70	58
Algorithms of Construction and Calculation of Equations of State of Two-Terminal Plants — R. P. Spiridonova and F. M. Kharchenko	81	68
Time Variation of Probability Distributions of Inventory Levels in a Multi-Item Supply System — V. V. Burinskii and T. I. Fursova	85	71
Estimates of Unknown Mean of Homogeneous Random Fields — A. I. Ponomarenko	95	79
Metric Properties of Trees — A. A. Voloshina and V. Z. Feinberg	101	84
Determination of the Possible Duration of Performance of a Set of Tasks — V. A. Afanas'ev and V. V. Karelin	108	89
Structural System Reserves with Repairs and Cold Reserves — I. A. Pogosyan and A. P. Akimov	111	91
A Method of Solution of a Nonlinear Programming Problem with Constraints of the Type of Equalities or Inequalities — E. A. Nurminskii	118	96
Calculating Estimates of a Parameter Which Nonlinearly Enters a Regression Function — A. V. Ivanov	123	99
Optimal Monitoring of a Monotonic Markovian Process — L. G. Gubenko	130	104
Controllable Semi-Markovian Chains — L. I. Gikhman	134	107
Linear Differential Games on a Plane. II — É. I. Boguslavskaya	142	113
Random Minimization Without Calculation of Derivatives — O. V. Guseva	148	117
Search for Optimal Control and Design of Self-Optimizing System with Linear Speed by Using Analog Computation Facilities — V. B. Gindes, E. A. Bashkov, and V. N. Veklich	154	121
A Class of Differential Games — V. I. Ukhobotov	161	127
Solution of a Parametric Optimization Problem — V. L. Tiskin	166	131
Aspects of the Application of Simple Testors — N. N. Aizenberg and A. I. Tsitkin	171	135
BRIEF COMMUNICATIONS		
Stochastic Gradient Method in Infinite-Dimensional Space — Z. V. Nekrylova	180	142
Convergence of Decision-Making Domains in Sequential-Analysis Problems — M. M. Diesperova	184	144

	Eng.	Russ.
Numbering Algorithm of a Sign-Varying Group – B. M. Zlotnik	189	147
Example of a Nonlinear Representation of a Homogeneous Vector Random Field – A. E. Gur'yanov	192	149
SHORT NOTES		
Realization of the Tools of Algorithmic Algebras in Uniform Structures – V. I. Kekeliya, G. M. Kirsanov, and G. E. Tseitlin	195	151

Volume 10, Number 2 March-April, 1974

Theory of Parallel Programming. Part I. Survey of Practical Aspects – V. E. Kotov	197	1
Concerning the Decoding of Automata – M. P. Vasilevskii	213	19
Noncalculability in the Class of Local Algorithms for Certain Predicates Associated with the Problem of Minimization of Boolean Functions – I. B. Gurevich	219	24
On Algebraic Automata – L. A. Skornyakov	226	31
Statistical-Logic Method of Synthesizing Microprogrammed Automata – A. V. Palagin, V. P. Denisenko, and V. A. Ivanov	231	35
Synthesis of a New Class of Devices for Decoding Cyclic Codes – Yu. N. Volkov and F. É. Keller	235	38
Features of the Best Approximation of Functions by Polynomials on Small Computers – B. R. Montsibovich and B. A. Popov	242	44
One Method of Determining a Measure of Importance of Blocks of Complex Schemes of Discrete Functional Elements – G. G. Sardaryan	248	49
Description of Finite Nonsimple Groups by Means of an Electronic Computer. II – Yu. P. Vasil'ev	257	57
DecAL Algorithmic Language to Solve Problems with Incomplete Information and Algorithms of Its Interpretation – G. Kh. Babich	261	61
Organization of Operations with Binary Trees Induced by Structures of Index Words – G. S. Antoshchenkov	274	72
On One Desequencing Algorithm – V. A. Val'kovskii	279	77
On Two Classes of CF-Languages with a Solvable Equivalence Problem – V. A. Yaffe	294	89
A Single-Server Queueing System with Waiting and Relative Priority – I. A. Pogosyan and A. I. Klimenko	301	94
An Optimal Algorithm of Control of a System Operating in Different Modes in the Case of Statistical Input Data – F. S. Payanov	305	98
Productivity of a Serial Chain of Processing Instruments with Failures – G. T. Artamonov	309	101
Testing Hypotheses for a Certain Class of Stochastic Systems with Distributed Parameters – P. S. Knopov and É. S. Shtatland	315	106
Analysis of Boolean Matrices Related to the Solution of Certain Genetic Problems – B. G. Mirkin and S. N. Rodin	318	108
Convergence and Rate of Convergence for the Method of Parametric Statistical Gradients – V. Ya. Katkovnik and L. V. Ovcharova	325	115
Mass Behavior and Integral Games. An Algorithm for Finding Equilibrium in Finite Integral Games. I – V. G. Ramm	330	119
Nonlinear Differential Pursuit Games – M. S. Nikol'skii	338	125
Some Classes of Optimal Control Problems Which Admit the Decomposition of the Π-Systems – M. G. Okhrimenko	345	131
Linear Differential Pursuit Games with Delayed Information – G. Ts. Dzyubenko	348	133
Certain Questions in the Theory of Grammar of Quasi-Recursive Generation – V. V. Byts	352	136
BRIEF COMMUNICATIONS		
Geometrical Aspect of Threshold Multivalued Logic – S. L. Blyumin	357	140

	Eng./Russ.	
Stochastic Approximation for Integral Equations in the Theory of Random Processes – G. I. Salov	359	141
Examples of the Solution of a Nonlinear Differential Equation by the Method of R-Functions for a Complex Region – I. V. Goncharyuk, V. L. Rvachev, and N. P. Senchenko	362	143
Minimal-Cost Flow in Certain Linear-Programming Problems – I. Kh. Sigal and Yu. Yu. Finkel'shtein	365	145
Teaching Programming in Lower Grades of Secondary School – Yu. A. Pervin	367	146
Automatic Processing of Aerial Photographs – V. B. Marchenko	369	147
SCIENCE INFORMATION		
International Symposium and Summer School. "Mathematical Foundations of Computer Science" – N. M. Nagornyi, A. V. Anisimov, and D. N. Todoroi	371	148
Bulgarian Science and Engineering Days – N. Kiseleva and A. Pisarskii	375	150

Volume 10, Number 3 May-June, 1974

Theory of Parallel Programming. Part II: Survey of Formal Models – A. S. Narin'yani	377	1
Minimization of Boolean Functions and Effective Recognition Algorithms – I. B. Gurevich and Yu. I. Zhuravlev	393	16
Method of Increasing the Reliability of Discrete Devices That Are Implemented using Microelectronic Circuitry – Yu. G. Karpov	398	21
Precision of Recognition Algorithms for Evaluating a Single Class of Tables – V. I. Terenkov	405	27
A Certain Case of the Special Problem of Functional Equivalence of Discrete Transformers – A. B. Godlevskii	412	32
Diagnostic Experiments for Two States with Automata – I. I. Kogan	416	36
Some Properties of Two-Dimensional Iterative Systems – O. M. Revin	419	39
Infinite Generation Criteria in Universal Algebras – G. E. Tseitlin	427	46
Spectral-Analytic Analysis of Estimators of Correlation Functions with Allowance for Their Linear Filtering and Sampling – V. A. Kunitsa	434	52
Analysis of Algorithms of Fast Multiplication in Digital Computers – V. I. Korneichuk and B. M. Shlem	446	63
Combinatorial Problems for Binary Reed–Muller Codes – D. A. Nudel'man	450	66
Syntactic Analysis of Context-Free (CF) Languages using Nondeterministic Push-Down Automata – A. Sh. Nepomnyashchaya	458	72
Formal Grammars Which Take Account of External Terminal Contexts – A. V. Anisimov	468	81
Reliability of Complex Systems Subjected to Periodic Perturbations – I. N. Kovalenko and E. M. Musaev	477	89
Parametric Statistical Estimators in Multistep Random-Search Algorithms – V. Ya. Katkovnik and O. V. Ovcharova	483	94
A Certain Problem in the Optimal Control of a System That is Described by an Elliptic Differential Equation – V. N. Gorchakov	492	101
Mathematical Expectation and Variance of the Magnitude of the Cut in a Linear Search – R. S. Guter	495	104
Bayes Estimate of Regression Coefficients for a Wiener Process – M. M. Diesperova	499	107
Equilibrium Situations in Dynamic Games – O. A. Malafeev	504	111
Methods of Searching Saddle Points – Yu. M. Danilin and V. M. Panin	514	119
Differentiation with Respect to Direction of a Function That Realizes a Maximum on a Polyhedron – V. M. Panin	521	125
Optimization Method under Nonstationary Conditions – A. M. Gupal	529	131
Methods of Solving Simultaneously Primal and Dual Convex-Programming Problems – L. A. Kirievskii	533	134

Eng./Russ.

BRIEF COMMUNICATIONS

Optimal Placement of Agents in Complexes of Tasks Specified by Networks – É. I. Volynskii and L. A. Krasin 538 139

An Algorithm of Recognition of the Effect of the Chemical Composition of Steel on Its Mechanical Properties – A. S. Lenovich 542 142

Investigation of a Correlation Algorithm for Sequential Piecewise-Linear Approximation to Local Topography – V. B. Marchenko 545 144

Realization of a REFAL-Interpretor on the Electronic Computer "M-220" – L. F. Lebedev. 547 146

Optimization of Array Accesses at the Level of a Language Close to the Original One – L. Ya. Karpman 549 147

Boundary Value Problems for a Second-Order Hyperbolic Equation in Hilbert Space – L. I. Vainerman 552 149

ABSTRACTS

On an Inequality in the Problem of the Approximation of Graphs – G. Sh. Fridman 554 151

SCIENTIFIC INFORMATION

Mathematical Methods of Prediction – I. V. Safonov 555 152

Volume 10, Number 4 July-August, 1974

Design Principles for a Multilanguage Modular Programming System – E. A. Zhogolev 557 1

Assignment and Design of Decoding Arrangements for Automaton States – V. V. Yaremenko 561 6

Concerning the Number of Reversals of the Stack Head of a Two-Way Push-Down Automaton – A. S. Barashko 564 9

Optimization of the Reliability Characteristics of Systems for Automating Experiments – V. M. Egipko 571 15

A New Principle of Equivalence in the Theory of Electronic Simulation and Its Applications – V. G. Mishutin and E. A. Proskurin 574 18

Some Properties and Transformations of Models of Data Files – É. A. Dedikov and N. I. Odrikovskii 579 23

Tree Sorting of Records in Computers – S. I. Kozlova 585 28

One Approach to the Problem of Syntactic Analysis – V. V. Shevchenko 588 30

Some Features of Optimum Chebyshev Approximation of Functions using Certain Rational Expressions on Small Computers – B. R. Montsibovich, B. A. Popov, and I. V. Sergienko 597 39

Stationary-State Evaluation for a Complex System with Slowly Varying Couplings – A. A. Pervozvanskii and I. N. Smirnov 603 45

Stochastic Programming with Finite Number of Experiments – Y. M. Ermol'ev and I. M. Mel'nik 612 52

Estimating the Rate of Convergence of the Random Search Method – N. Z. Shor and M. B. Shchepakin 615 55

Minimization or Nondifferentiable Functions in the Presence of Noise – E. A. Nurminskii 619 59

Solution of Variational Problems and of Control Problems by the Stochastic Gradient Method – Z. V. Nekrylova 622 62

Minimization of a Class of Nonconvex Functions – S. A. Kantsedal and Yu. B. Maksimov 627 67

Asymptotic Behavior of Parameter Estimates for One Nonlinear System – A. Ya. Dorogovtsev 633 72

Stability and Convergence Rate of Some Algorithms of Conjugate Directions for Function Minimization – V. V. Ivanov and K. Dzhumaev 640 78

Mass Behavior and Integral Games. The Algorithm of Finding Equilibrium in Finite Integral Games. II – V. G. Ramm 652 88

	Eng.	Russ.
Conjugate-Directions Method for Finding Saddle Points – Yu. M. Danilin and V. M. Panin	660	94
Linear Differential Games on a Plane. III – É. I. Boguslavskaya	668	100
On an Adaptive Inventory Control System – S. M. Sil'vestrova	670	102
Algorithms of Bilinear Programming – E. N. Sokiryanskaya	676	106
Minimax Theorem for Certain Differential Games in Partial Derivatives – L. M. Unigovskii	686	113
Note on Minimization Methods Employing Space Stretching – V. A. Skokov	689	115
Asymptotic Solution of a Class of Optimal Control Problems – V. A. Plotnikov and A. I. Tret'yak	693	118
Experiment Planning in Inverse Problems of Mathematical Physics – A. B. Uspenskii and V. V. Fedorov	700	123
One Method of Handling Indices of Complex Structure – L. Ya. Karpman	708	129
Problem of Selecting a Recognition Algorithm in a Class of Voting Algorithms – A. B. Doktorovich	715	135
Methods of Statistical Physics as a New Approach to the Mathematical Theory of Epidemics – A. R. Rotenberg	722	141
BRIEF COMMUNICATIONS		
Problem of Converging of the Methods of "Digit-By-Digit" Computation of Elementary Functions – A. V. Pisarskii, A. F. Kurgaev, and A. V. Palagin	728	147
Communication Concerning a Translator from a Tabular Language into Cobol – E. A. Voevodin	731	149
SCIENTIFIC INFORMATION		
Sixth International Conference of Social Security Specialists and Statisticians	738	151

Volume 10, Number 5 September-October, 1974

Theory of Parallel Programming. Part II. Survey of Formal Models – A. S. Narin'yani	735	1
Formal Synthesis and Realization of Automata on the Basis of Standard and Homogeneous Circuits. Part I – A. T. Mishchenko	749	15
On a Certain Basis of Operators and Predicates with an Undecidable Emptiness Problem – G. N. Petrosyan	758	23
Realization of the Means of Algorithmic Algebras in Homogeneous Structures – V. I. Kekeliya, G. M. Kirsanov and G. E. Tseitlin	765	29
On Classes of Structures for Functional Algorithms – V. I. Shevchenko	773	36
Two-Way Nondeterministic Automata – A. N. Kolodin	778	40
On a Certain Algorithm for the Construction of Minimal Tests – V. I. Sharapov	786	46
On the Synthesis of an Operational Processor with Composite Two-Ports – V. I. Usynin.	789	49
On a Certain Approach to the Solution of Allocation Problems – M. F. Kaspshitskaya, I. V. Sergienko and V. I. Khil'chenko	792	51
On Certain Problems of n-th Rank Languages. Part I – H. Andrejka, T. Gergely, and I. Nemethy	804	61
The Problem of Distinguishing Among Hypotheses for Isotropic Random Fields – M. I. Yadrenko	813	68
On the Productivity of a System and the Problem-Solving Time in the Presence of Random Failures and Periodic Memorization of the Results – I. N. Kovalenko and L. S. Stoikova	820	73
A Single-Queue System $\Sigma_n\|G\|1$ with Relative Priority and a Constraint on the Waiting Time – I. A. Pogosyan and A. I. Klimenko	824	76
Queuing Systems from the Class $< G_1, G_1(\eta), E(\eta)/m, 1 >$. Part I – I. Z. Gabrovski, I. I. Ezhov and A. M. Zakharin	830	80
Deviation from Coincidence with a Terminal Set Having a Piecewise-Smooth Boundary – A. A. Chikrii	839	86

	Engl.	Russ.
Finding a Path in a Graph Which Satisfies Specified Constraints – A. V. Maksimenkov	845	90
Estimating the Quality of Statistical Trials in Complex Systems – S. F. Shustov	848	93
Linear Stationary Discrete Systems with Aftereffect – N. I. Osetinskii	852	96
On a Certain Discrete Pursuit Game on Graphs – I. M. Asel'derova	859	102
Concerning the Problem of Optimal Distribution of a Time Resource – V. F. Bilyuba	864	106
On a Certain Sequence of Additively Differing Numbers – V. S. Bludov and V. I. Uberman	870	111
The Problem of Evading Collisions in Linear Discrete Systems – N. Satimov	877	116
A Certain Technique for the Recursive Solution of the Concave-Programming Problem – I. M. Putsima	881	119
Certain Problems Involving Simple Random Walk on a Straight Line – V. A. Ivanov	884	122
Optimal Linear Filters for Preliminary Processing of Images – V. A. Kovalevskii, V. G. Sibirtsev, and O. J. Tretiak	890	127
A Certain Strategy of Search for the Solution of Transformation Problems – V. P. Gladun, N. I. Galagan and S. P. Sasina	898	134
BRIEF COMMUNICATIONS		
The "Bottleneck" Rule in the Johnson Problem – L. A. Markov and A. A. Pervozvanskii	907	142
Choosing the Model of an Investigated System – P. P. Chabanenko	911	144
Linear Self-Dual Group over GF(2) and Its Effect on the Algebra of Boolean Functions – I. E. Strazdin'	914	146
The Γ-Complexity of Systems of Multivalued-Logic Functions – A. E. Bobrova, N. F. Kostyanko, and B. N. Ugarov	916	147
Concerning the Problem of the Asymptotic Complexity of a System for Statistical Monitoring of a Combinational Network – M. S. Bershtein and A. M. Romankevich	919	150
The Third International Symposium on the Mathematical Foundations of Computer Science (MFCS-74) – V. K. Evtimov	921	151

Volume 10, Number 6 November-December, 1974

Means of Describing Computer Hardware and Software – V. M. Glushkov, Yu. V. Kapitonova, and A. A. Letichevskii	925	1
Experimental Development of Software for an Advanced Computer Array – V. A. Grebnev, Yu. V. Kapitonova, A. A. Letichevskii, V. V. Bublik, A. E. Doroshenko, and A. P. Zhezherun	930	7
Formal Synthesis and Realization of Automa on the Basis of Standard and Homogeneous Schemata. II – A. T. Mishchenko	935	12
Methods of High-Speed Division Which Are Based on Iterative Processes – I. V. Sergienko and G. S. Tesler	945	21
Overall Structure and Multiprogramming Resources of an Interpreting Processor for a Computer Installation – V. A. Grebnev	951	26
Use of the MIR-2 Computer for Program Analysis – A. A. Letichevskii and V. S. Kostyrko	955	31
Representation of Languages in Bobsled (BS) Automata – G. E. Tseitlin and E. L. Yushchenko	963	40
Definers and a Method of Definer Processing – V. N. Red'ko	976	52
Control Apparatus in Syntactic Analyzers – A. V. Anisimov	981	57
Dialog System for Program Debugging and Editing in the LYaPAS-M Language – A. D. Zakrevskii	984	60
Comparative Evaluation of the Performance of Machine-Independent Translators Which Have Been Developed on the Basis of the ALMO Language – É. S. Lukhovitskaya	986	63

	Eng.	Russ.
A Metasystem for Creating Information-Coupled Specialized Programming Systems – I. A. Mel'nikov, K. O. Myartin, É. V. Pruuden, Yu. I. Pruuden, R. A. Pukk, Kh. Ya. Saar, and B. G. Tamm	992	69
Program Generator in a Modular Programming System – É. Kh. Tyugu	998	74
Certain Questions on n-th Order Languages. II – H. Andrejka, T. Gergely, and I. Nemethy	1003	79
Metalanguage of TR-Grammars – V. I. Konstantinov	1009	84
Distribution of Busy Periods of Certain Complex Service Systems – A. M. Zakharin	1015	90
One Stochastic Programming Problem with Constraints of a Probabilistic Nature – A. M. Gupal	1019	94
Investigation of One Regulating Step in a Quasigradient Method of Minimizing Weakly Convex Functions – E. A. Nurminskii and A. A. Zhelikhovskii	1027	101
Problem of Typification of Technological Objects – I. A. Vdovichenko, V. A. Trubin, N. Z. Shor, and G. N. Yun	1032	106
Enumeration of Shortest Connecting Nets with Additional Constraints – A. V. Kozina and V. P. Kozyrev	1035	109
Noether's Theorem for Problems with Nonsmooth Integrands and Its Use in Minimizing Displacement Integrals – M. A. Rvachev	1043	116
On Logical Orbits of Recognition Systems – T. M. Dadashev	1050	121
One Approach to Reducing Exchanges in Working with Data Blocks – F. I. Andon and A. A. Zhmurov	1063	134
Investigation of One Algorithm for Teaching Recognition with Automatic Control of Step Size – R. M. Reidman	1071	141
BRIEF COMMUNICATIONS		
Problem of Automata Equivalence with Respect to the Direct Product of Groups – L. B. Smikun	1076	145
SCIENTIFIC INFORMATION		
All-Union Symposium on 'Systems Programming Languages and Methods of Their Realization' – A. I. Khalilov and E. L. Yushchenko	1078	147
